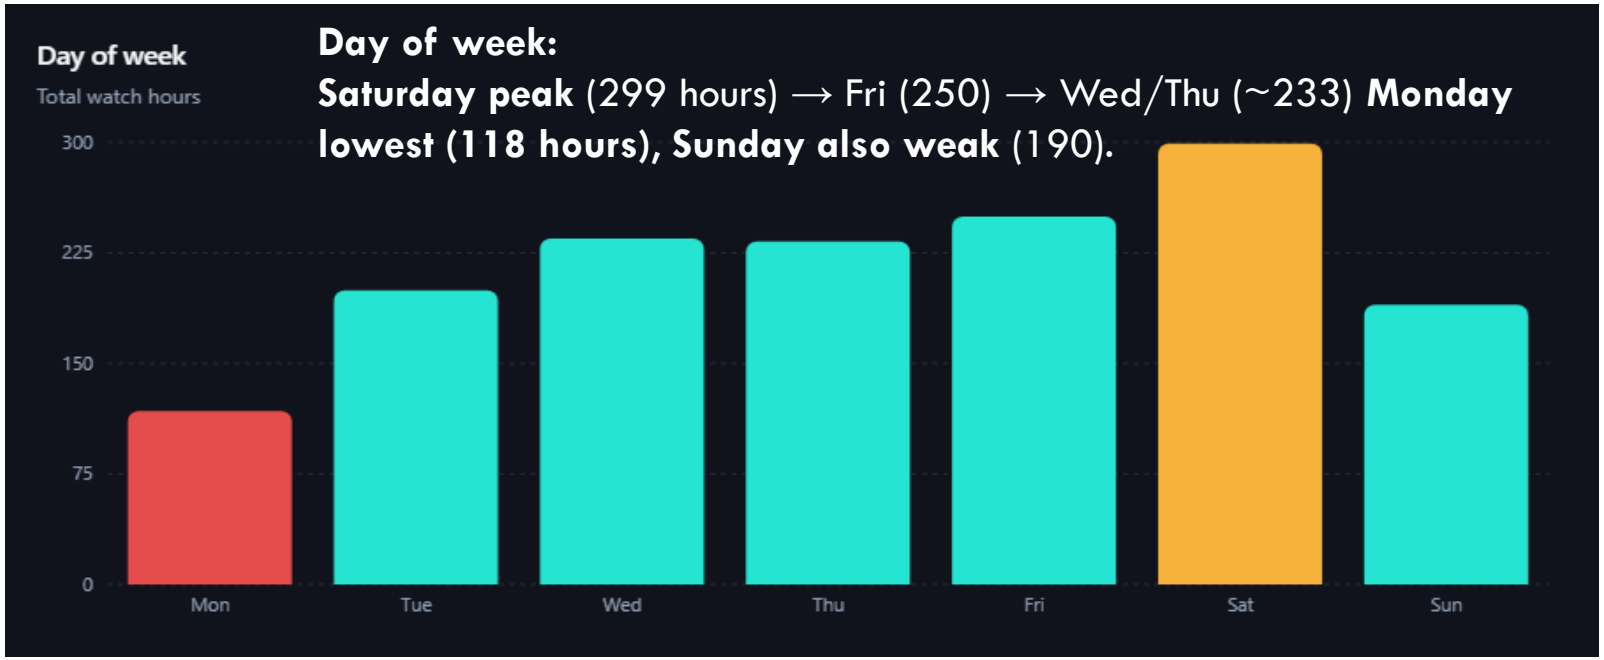
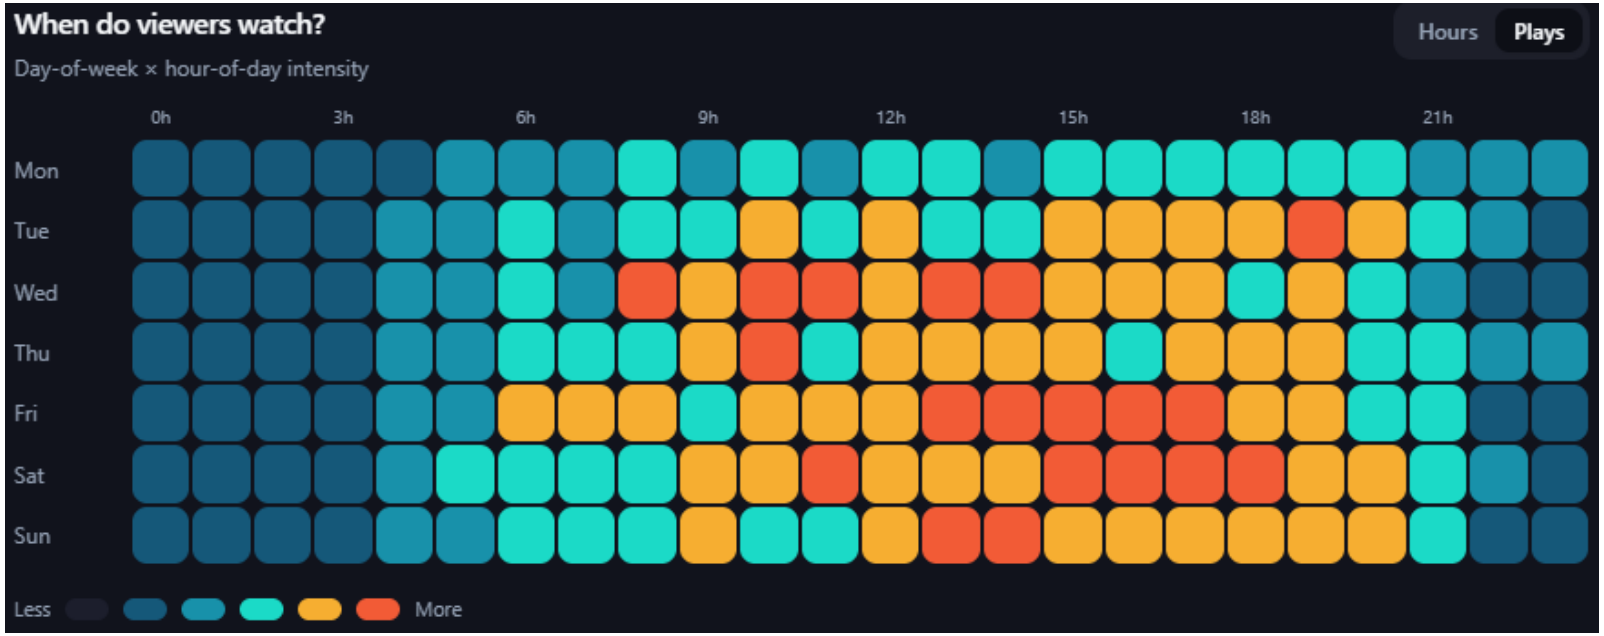
Bright TV — Insights

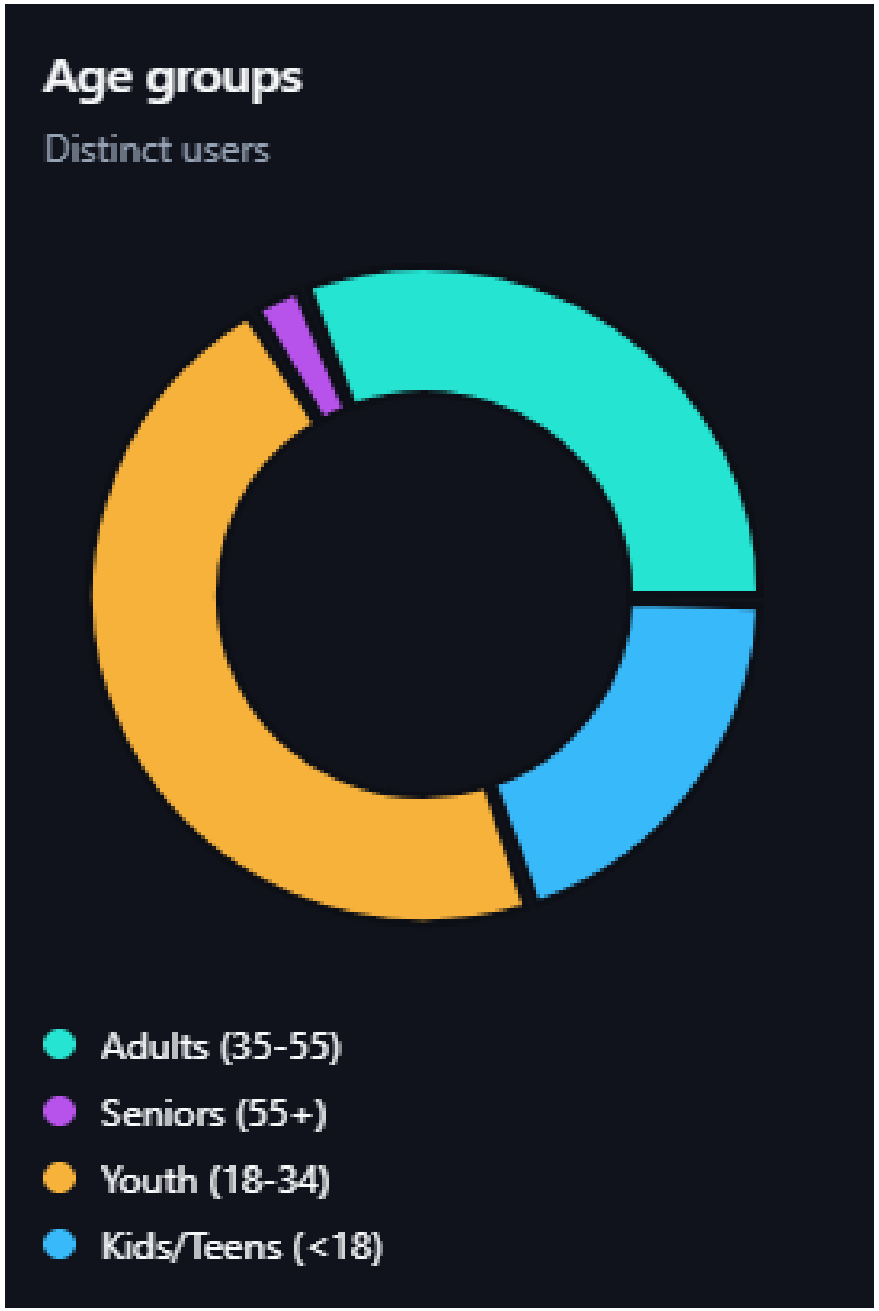
Dataset: ~11k viewing records, ~5,200 unique users, Jan–Feb 2016, 10 SA provinces.

Dimension	Largest segments
Age	Youth 18–34 (49% of users, 852 hrs) → Adults 35–55 (32%, 570 hrs) → Kids/Teens (20%, 74 hrs) → Seniors (2%)
Gender	Male skews ~75% of plays (8.7k vs 977 female plays); huge female under-representation
Province	Gauteng 33% → Western Cape 15% → KZN/Mpumalanga/EC/Limpopo mid-tier; Northern Cape & Free State very small
Race	Black 38% of users → no_race 25% → Indian/Asian 15% (highest avg watch-time per user) → Coloured 13% → White 15%

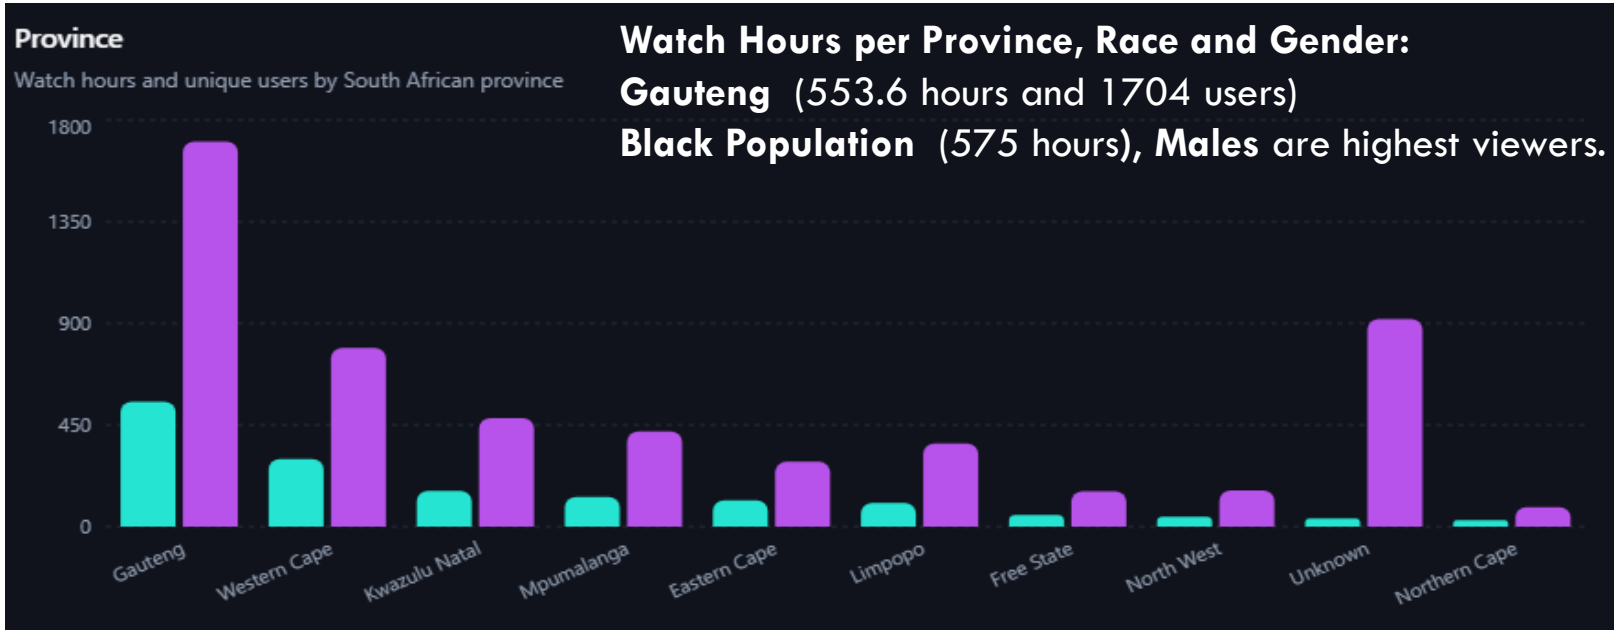
Day of week:
Saturday peak (299 hours) → Fri (250) → Wed/Thu (~233) **Monday lowest (118 hours), Sunday also weak** (190).

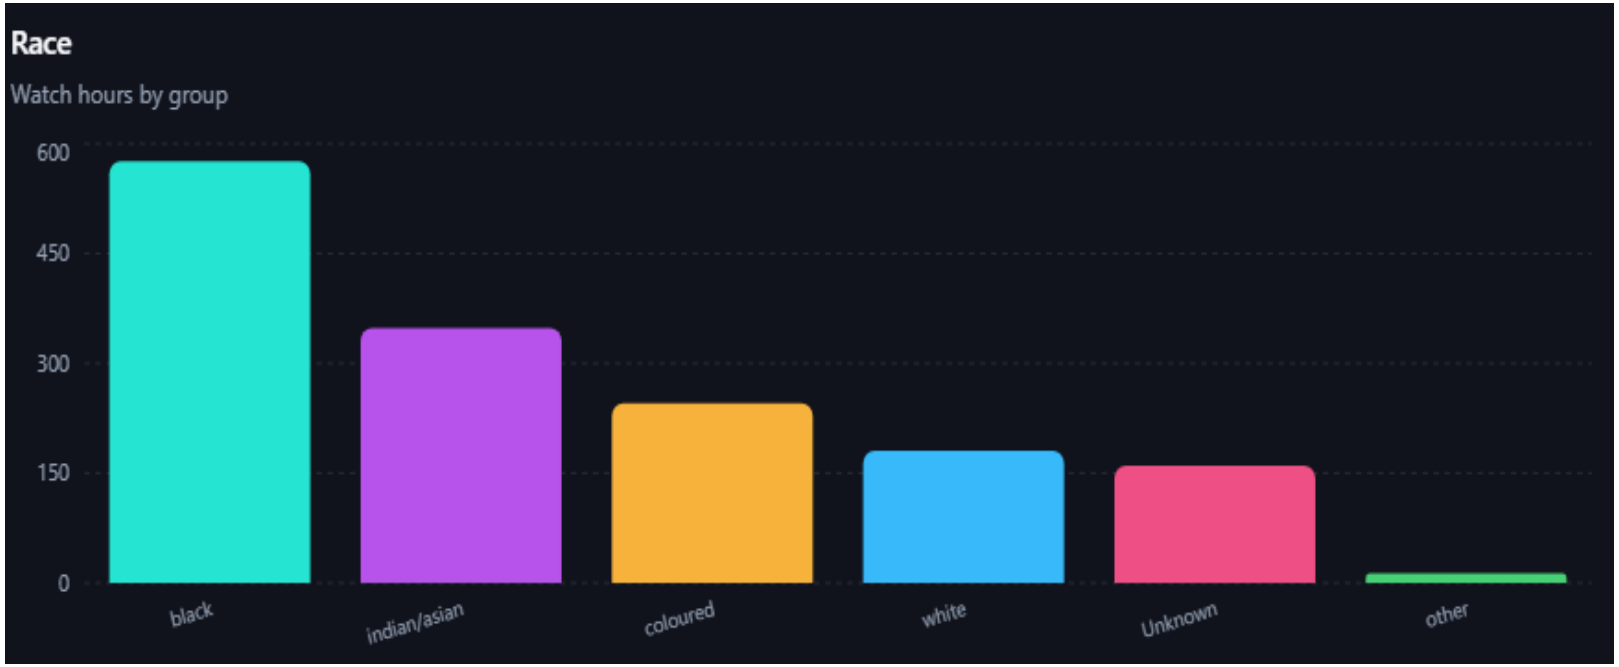


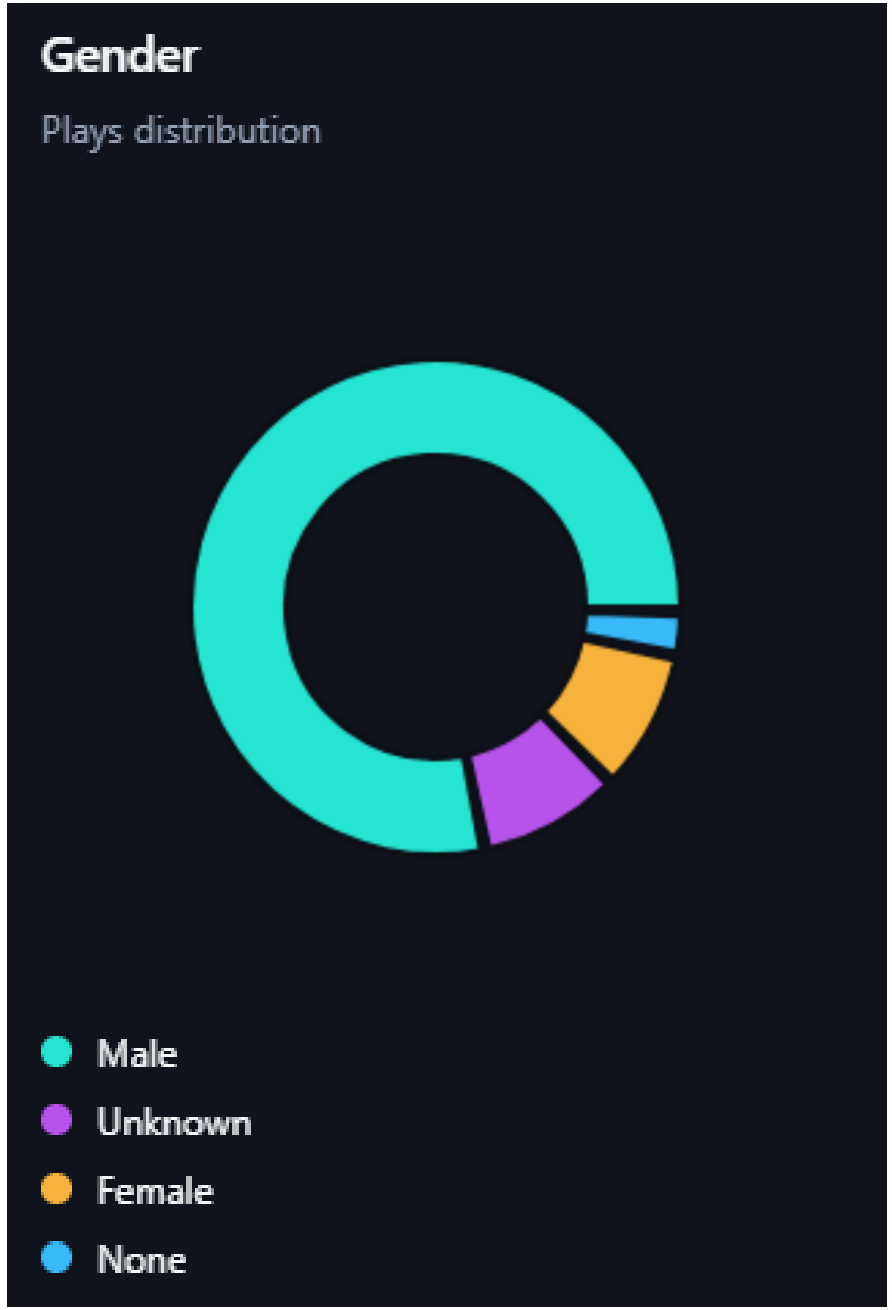


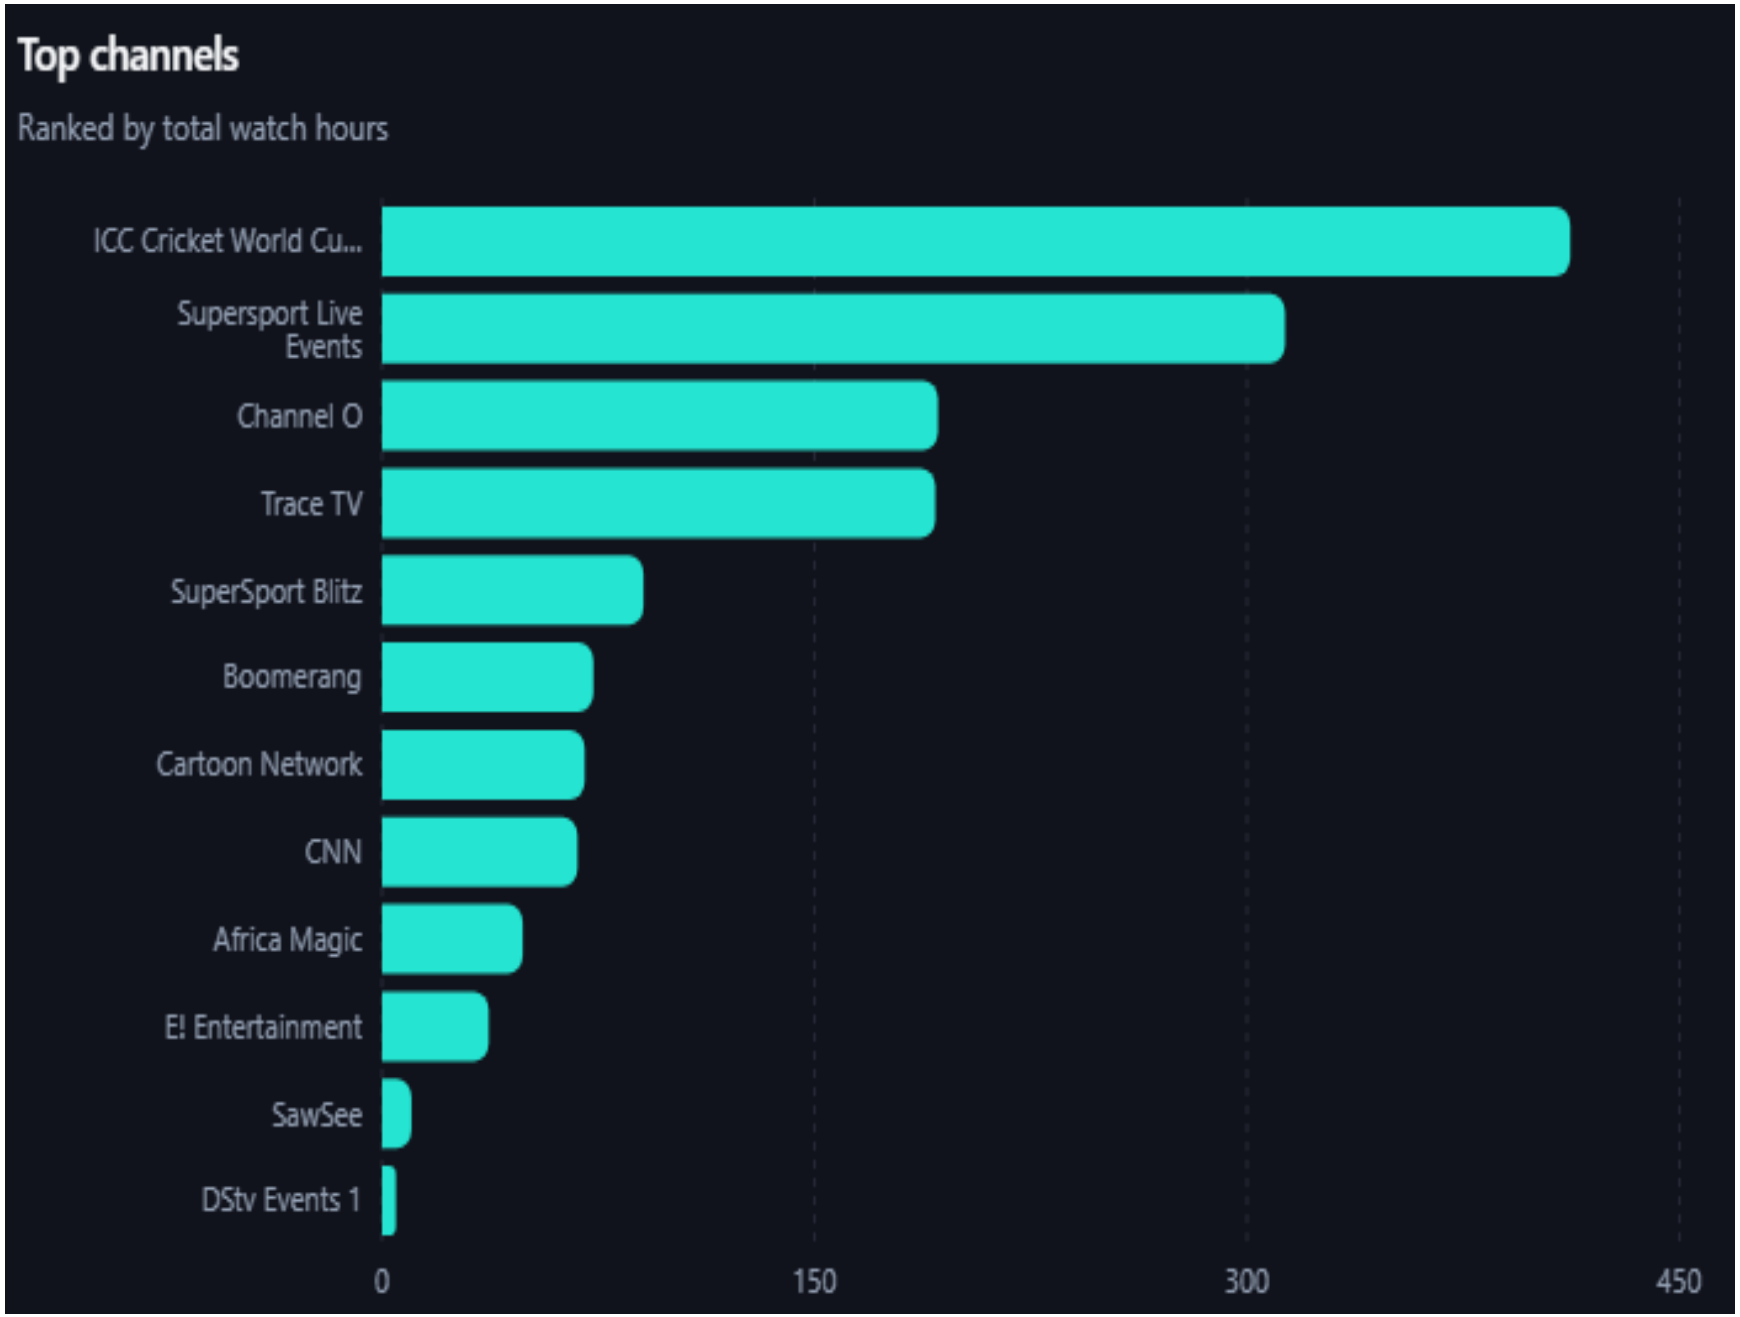


Watch Hours per Province, Race and Gender:
Gauteng (553.6 hours and 1704 users)
Black Population (575 hours), **Males** are highest viewers.









Content trends:

Sports dominates: ICC Cricket WC 2011 (412 hrs, **17 min avg session** — highest engagement), Supersport Live Events (313 hrs), SuperSport Blitz.

Music & youth channels strong: Channel O (193 hrs), Trace TV (192 hrs).

Kids: Boomerang + Cartoon Network = ~144 hrs.

News/Lifestyle modest: CNN (68 hrs), E! (37 hrs).

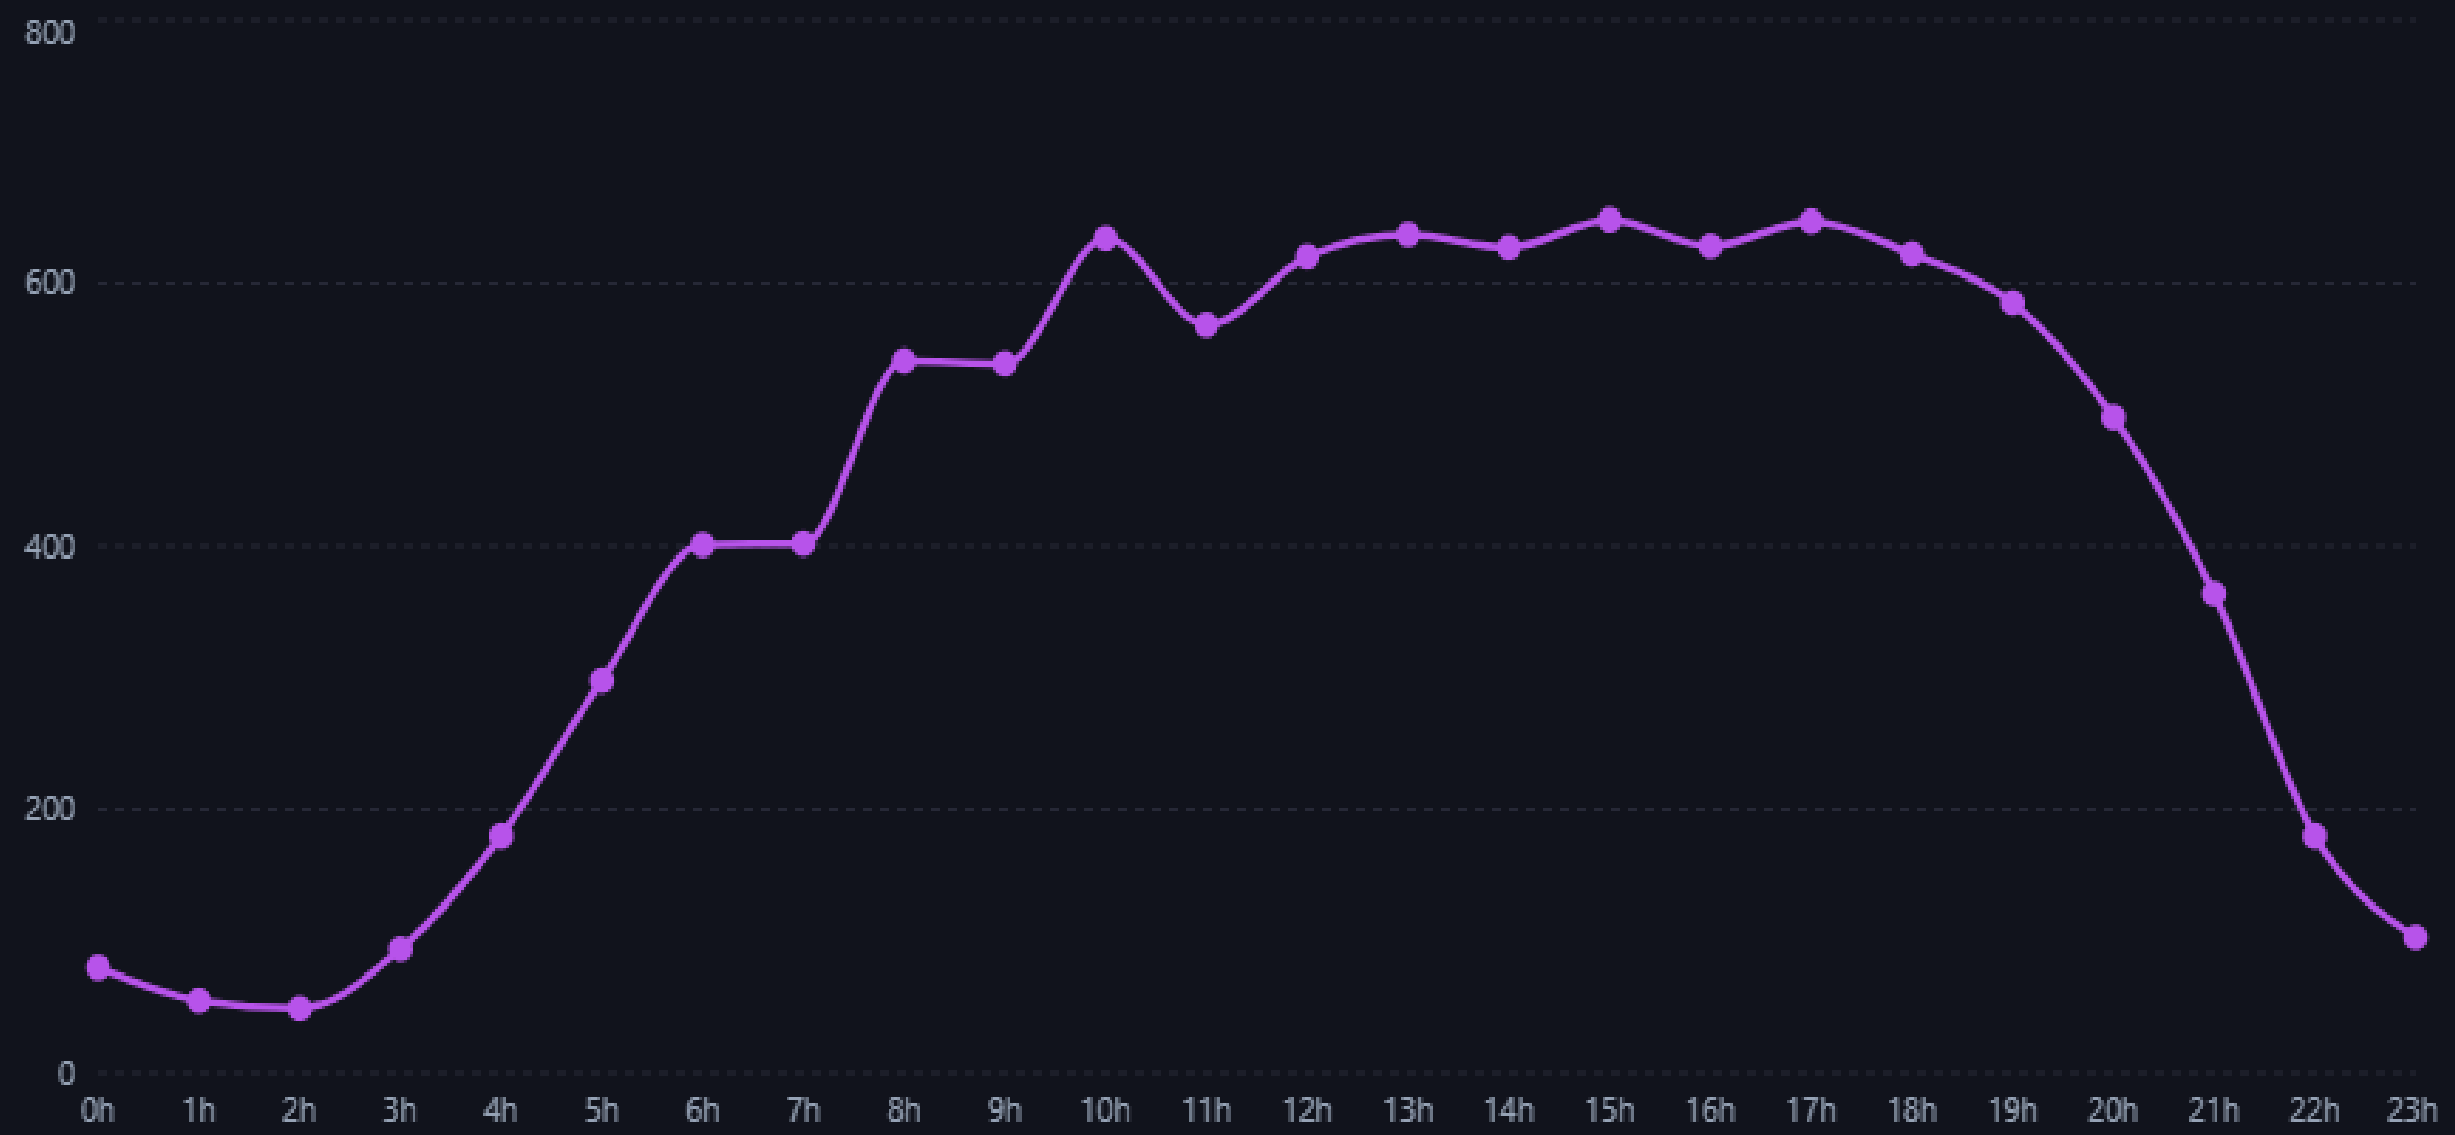
Local channels (M-Net, kykNET, Vuzu, Africa Magic) underperform on hours despite plays — short sessions = low stickiness.

Senior segment (55+): only 113 users — low consumption and suggest to partner with retirement communities + add classic-movies/news-heavy bouquet.

Hour of day

Plays across the 24-hour cycle

Hour of day: Two peaks — **midday 12–15h** (~118 hrs/hour) and **early evening drops off after 18h.** Low engagement 23h–04h.



Bright TV — Factors Influencing Consumption

Live sports events drive the longest sessions (cricket sessions 3× the platform avg).
Demographics: Young males in Gauteng/WC = the core. Female and Senior segments are massively under-served.
Geography & infrastructure: Gauteng + WC = 54% of all hours — correlates with urban broadband availability.
Day-part patterns: Weekend leisure + lunchtime breaks; Mondays suffer ("back-to-work" slump).
Data quality: ~19% of records have no_province/no_gender/no_record_date — limiting personalisation. Also ~764 Kids/Teens plays show no_channel.

Bright TV — Content Recommendations for Low-Consumption Days - Mon & Sun Evening

Slot	Recommendation
Monday prime-time	"Weekend Sport Recap" shows (cricket/football highlights), Monday-only premieres of telenovelas/Africa Magic dramas, reality TV (E!) blocks
Sunday evening	Family movies, faith/lifestyle programming, music countdowns on Channel O / Trace TV
Late-night (22h–04h)	Short-form comedy, eSports, music videos targeting youth night-owls
Midday weekdays (12–15h)	Short-form news bulletins (CNN), lifestyle/cooking — capitalise on existing peak
Kids weekend mornings	Boomerang/Cartoon Network marathons + interactive kids programming

Bright TV — Initiatives to Grow the User Base

Close the female gap (only ~10% of plays). Acquire/commission lifestyle, drama, telenovela and reality content.
Geographic expansion — Northern Cape, Free State, North West together = <8% of users. Run localised marketing + lower-data "Lite" streaming tier for lower-bandwidth provinces.
Local-language content — boost kykNET (Afrikaans), Africa Magic, M-Net dramas with Zulu/Xhosa/Sotho originals to lift the Black viewing.
Sports-led acquisition funnel — bundle football/rugby events as free trials; sport has highest watch time.
Family/Kids tier — only 20% of users are kids; create a parent-controlled kids profile with offline downloads.
